Course Rules

Rules

Students Rule

1. Integrity First Rule
2. Two Hats Rule

Professor/TA Rule

1. Be fair Rule
2. Help Students Become Skilled Problem Solvers Rule

Students Rules

1. Integrity First Rule – Protect Your Integrity

- Integrity is not just for academics; it’s part of who you are.
- Avoid all forms of cheating.
- Be truthful with yourself — if you cut corners, you’ll ultimately undermine your own growth.

2. Two Hats Rule – Learn and Solve

- In ASE courses, you are professional problem solvers; focus on effective and efficient problem solving.
- At the same time, you are students — it’s your job to learn, explore, and improve.

Professor/TA Rules

1. Be Fair

- The professor treats all students equally.
- Any perception of any form of unfairness **must** be addressed immediately for resolution.

2. Help Students Become Skilled Problem Solvers Rule

- The goal is to guide you to become competent, confident, and ethical problem solvers.
- Learnings should be enjoyable, and solving problems are rewarding.

Other Rules

- All additional rules will be derived from these four core rules, and details will be available on Canvas.
- When in doubt, ask.
